### **ABOUT WEBINAR**

Intellectual property rights (IPR) are the rights given to persons over the creations of their minds. They usually give the creator an exclusive right over the use of his/her creation for a certain period of time. This webinar will enable people to know about patents, copyright, trademarks and to earn recognition or financial benefit from what they invent or create. By striking the right balance between the interests of innovators and the wider public interest, the IP system aims to foster an environment in which creativity and innovation can flourish. The primary aim to organize this webinar is to create awareness about the IPR. This webinar is organised for people from different sections of our society to enable them to gain the benefits of this awareness programme. This is the first part of the series of webinars proposed in the near future in the interest of the participants and in anticipation of the success of this webinar.
